**Mr. Engineer, respected director of the company**

**MY regards**

**Introduce myself Mohamed el bassiony ragheb**

**I work as a concrete and finishing supervisor**

**I am honored to join the work team of your esteemed company**

**MY work tasks :**

**Receiving the project plans and the land of the project to be implemented, then signing the boundaries of the land with the total station, and I bring the drilling equipment. The rig determines the place to be excavated, and we determine the location of the architectural zero ruber for the project and make a wall around the project. After excavation, we make soil replacement and compaction test samples every 30cm depth after completing the replacement stage I will have a work team consisting of carpenters, blacksmiths and assistants, then we will bring the surveyor to sign the axes and axes of the columns in order to start making the wooden beams for the regular bases, then the reinforced ones, then the necks of the columns, then I will bring the insulation contractor and after completing the isolation of the necks of the columns**

**We do backfilling and leveling, and then backfilling buildings**

**And insulating the outer perimeter of the buildings with bitumen, then we pour the floor of the building and complete the columns, the ceiling and the rest of the floors, and we make the interior finishes after the completion of two floors, and the finishes start with the buildings item and before that we do X finishing the theory of Vitha Gorth or bring the surveyor with the total station to do that**

**Able to perform any other task assigned within the scope of specialization**

- The ability to do site inventory if necessary**
- I have full knowledge of industry assets for all stages of interior and exterior finishing, commercial, private and recreational, including swimming pools**
- I have a lot of experience in the interior and exterior finishes of towers**

**And experience in the work of curbstones, interlocks and stones**

**such as mica, basalt and marble**

**-I have a private **Egyptian license****

## **The work that I carried out for the companies**

**Al-Imtiaz Real Estate Investment and Contracting Company from 2017 to**  
**2027**

**The Administrative Capital** : A project of 10 towers with a height of 8 floors  
was established and implemented

**Each floor has 8 apartments, the area of the apartment is 90 square meters,  
consisting of two rooms, a hall, a kitchen and a bathroom. Concrete works  
and finishes for all business items. The project period is 3  
years.**

**6th of October City**: a project for finishing works for villas, number 20, two floors, each floor an apartment

Consisting of 3 rooms, reception, kitchen and bathroom, Housing Bank Street, for 2 years

**Menoufia Governorate project** : constructing 4 concrete towers, interior and exterior finishes, social housing

Under the management of the armed forces, each tower consists of a ground floor and eight floors, and each floor has 7 apartments. The apartment consists of 3 bedrooms, a kitchen, a bathroom, and a hall. The area of the apartment is 90 square meters.

Concrete and finishing works. The duration of the project is two years

**Qatar - Doha: Ramaco Engineering and Contracting Company:2015to 2017**

I worked with them to follow up and implement a residential tower with 11 ground floors, shops and 10 upper apartments

Each floor has 7 apartments, the area of the apartment is 150 square meters, finishing works for all business items from buildings to final delivery, and it is located in Doha, Umm Ghalina

### **Sharm El-Sheikh: Image Company from 2008 to 2015**

**The company that owns the Hilton Sharks Bay Hotel and Tourist Resort, behind Sharm El-Sheikh Airport in the Al-Gharqana area, the project consists of 3 phases (two phases of concrete and finishes, swimming pools, and a phase of replacement and renovation finishes). And a bathroom - and a model of two rooms, a hall, and a bathroom) and a main building consisting of 3 ground floors (restaurants, kitchens, laundries, stores, group bathrooms, and the first floor (offices, reception, night clubs, and disco halls).**

**And bazaars, and the third floor is the residence of two managers, the administrative building area is 5000 meters**

**There is a water boiler building for the rooms, green spaces, landscapes, and swimming pools**

### **UAE, Sharjah, Dubai Towers Contracting Company: from 2005 to 2007**

**I implemented a villa project for Al Safa 2 neighborhood in Dubai, with concrete and finishing works**

**Saudi Arabia, Jeddah c ity: Al-Ghamdi Contracting Company from 1992 to 2001**

**Implementation of residential, recreational and commercial projects (private villas and buildings - educational buildings, concrete and finishes in Jeddah and its suburbs)**

Greetings, and sorry for the long delay
