PROJECTS

Human Detection Robot

B+

- Human detection robots like Spiderbot, supported by the Flatter mobile app, efficiently locate and rescue survivors trapped under rubble after a disaster
- Spiderbot is a sophisticated robot designed to navigate through debris and rubble in challenging environments. Equipped with advanced sensors, thermal imaging, and acoustic detection systems, Spiderbot can identify human presence even in complex and obstructed settings. Its mobility and versatility enable it to maneuver through tight spaces and uneven terrain, enhancing its ability to reach and assist survivors who might be trapped under rubble.
