Work Experiences

Welder

December 29th, 2019 - Present

RHEINMETALL Algérie

1. **Reading Technical Plans:** Examine and understand the technical plans of the special vehicle to be manufactured.
2. **Material Preparation:** Prepare metal parts by cutting, grinding, and cleaning them as required.
3. **Precision Welding:** Utilize various welding techniques to assemble parts in accordance with specifications.
4. **Quality Control:** Inspect welds to detect and correct defects, ensuring their strength.
5. **Collaboration:** Work as a team with designers and assemblers to ensure accurate component assembly.
6. **Adherence to Safety Standards:** Follow safety protocols, use personal protective equipment (PPE), and avoid risks.
7. **Adaptability:** Adapt to the different requirements and configurations of specialized vehicles.

8. **Documentation:** Maintain accurate records of completed welds and materials used.
9. **Equipment Maintenance:** Regularly maintain and inspect welding equipment to ensure proper functioning.
10. **Communication:** Communicate with team members to resolve issues and optimize the manufacturing process.

Skills

Plan Reading: Ability to interpret and accurately follow technical plans for assembling components according to specifications.

Precision and Attention to Detail: Aptitude for working meticulously, ensuring precision and quality in welds and assemblies.

Quality Control: Competence in inspecting and evaluating welds, identifying defects, and making necessary corrections.

Teamwork: Effective collaboration with fabrication team members, designers, and engineers to achieve common goals.

Adaptability: Flexibility to adjust to different types of specialized vehicles and their unique requirements.

Workplace Safety: Thorough knowledge of safety procedures and proper use of personal protective equipment (PPE) to minimize risks.

Material Management: Skill in selecting and preparing appropriate materials for each welding project.

Communication: Ability to communicate effectively with team members and supervisors to troubleshoot issues and optimize the manufacturing process.

Preventive Maintenance: Knowledge of regular maintenance of welding equipment to ensure proper functionality.

Time Management: Capacity to efficiently manage time to meet manufacturing and delivery deadlines.

Needs Analysis: Aptitude to assess specific requirements of specialized vehicles and adapt welding methods accordingly.

Technical Creativity: Finding creative solutions to technical challenges that may arise during vehicle assembly.

Problem Solving: Competence to promptly identify and resolve issues related to welds and assemblies.

Documentation: Capability to maintain accurate records of completed welds, materials used, and quality control results.

Diplômes

Welding Diploma

November 20th, 2012:

At Saleh Lebssir Vocational Training Center, Ain Smara,
Constantine.
