SKILLS

- Hospital laboratory work
- Laboratory report analysis
- Laboratory safety procedures
- Laboratory testing diagnostics
- Laboratory cleaning
- Laboratory trials

I want to work in a research laboratory it was my dream

I am very passionate about biological scientific research, immunology, and biochemistry,

find techniques more suitable for determining cell structure,

I would also like to group several biological disciplines to better understand the role of certain amino acids glutamic acid and glucose which are crucial elements in the development of cancer understand the mechanism of angiogenesis.....

EXPERIENCE

June 2015 to Current

ATTACHED LABORATORY *université essenia*, Oran, Algeria

I prepared the laboratory in order to carry out practical work in parasitology, to help students identify certain parasitic species.

prepare reagents to identify oocytes, nematodes, fish parasites, and bovine and ovine eggs and larvae

I worked in a clinical analysis laboratory where I took blood samples, hemostasis, biochemical analysis.

I did an internship for 6 months in which I took knowledge in different Microbiology units, the bacteriology department, blood culture, serology, determining BK using the Niel zelson staining technique.

- Prepared, analysed and labelled media, specimens and samples.
- Disposed of finished samples and related waste materials safely.
- Observed strict laboratory hygiene rules and procedures to eliminate specimen contamination.
- Guaranteed laboratory was well-stocked by performing routine storage checks.
- Received, sorted and labelled clinical samples carefully, following strict laboratory regulations.
- Stored chemical and biological materials to prevent degradation.
- Modified laboratory techniques to reflect needs of different projects.
- Processed samples methodically and efficiently.
- Routinely serviced and cleaned lab equipment in line with manufacturing instructions.
- Carried out sample failure analysis and reported findings.

EDUCATION

2019

Master of Science PARASITOLOGY AND BIOCHEMISTRY

University AHMED BENBELA 1, ORAN

I obtained a higher study diploma in biochemistry in 2001 then I was able to complete my studies in Parasitology in 2019 where I received a Master 2 diploma

at the moment I have been working in a parasitology laboratory since 2015.

- [Degree] Graduate
