Objective

Seeking a challenging career opportunity in the field of Information Technology to leverage my expertise in network management, software maintenance, and system security, while contributing to the growth and success of the organization.

Work Experience

Technical Engineer - Contrack (Orascom Group)

- Developed and maintained infrastructure for the Nile City Towers and Hotel.
- Executed maintenance and repair of suspended ceilings.

Technical Support - Orange Company

- Analyzed and solved technical problems related to telecommunication lines.
- Conducted system data analysis and implemented system enhancements.
- Configured firewalls to strengthen system security.

Software Maintenance Engineer - Mall IT Department

- Maintained and updated software for computers and laptops.
- Installed surveillance cameras and ensured information security.

IT Network Engineer - English Public Transport Company

- Managed and maintained computer networks and applications.
- Built and maintained communication and internet networks.
- Implemented advanced network security measures to prevent data breaches.
- Designed and installed surveillance systems.

IT Network and Software Engineer - Matrix One

- Developed comprehensive network infrastructures.
- Managed and secured computer systems and applications.
- Recovered critical data post-system failures.

IT Network and Software Engineer - Sumitomo (Japanese Company)

- Built and maintained efficient and secure communication networks.
- Implemented data recovery solutions and high-level network designs.
- Installed and maintained surveillance camera systems.
