

Ghofran Sabbah

OBJECTIVE

To pursue diverse training opportunities that broaden my skill set and deepen my knowledge base, leading to a fulfilling and impactful career path.

EXPERIENCE

Graduation Project 1 | Fall 2023

- Designed ER diagrams and DFDs to illustrate system structure.
- Developed a comprehensive plan for implementing the project idea.
- Enhanced research skills through project development.

Decision Support System Project (Arena) | Fall 2023

- Developed and implemented a decision support system using the ROUTE, SEQUENCE, DRILL-PRESS, LEAVE, conveyor, and transfer modules to simulate package processing.
- Analyzed potential bottlenecks in the system and proposed solutions for optimization.
- Explored the impact of varying capacities and worker pools on system efficiency.

Decision Support System Project (tableau) | Fall 2023

Network Design Project (Cisco) | Fall 2023

Graduation Project 2 | winter 2024

- Designed and implemented the database using SQL Server for a website project.
- Utilized the MVC pattern to access the model and create tables as the initial step in the project's structure.
