

## Academic qualifications

### July 2019 to August 2024 **Bachelor of Production Mechanics**

akhbar elyom academy, 6 october city

An educational academy accredited by the Ministry of Higher Education and the Supreme Council of Universities. It is a member of the Egyptian Syndicate of Engineers and an active member of the Federation of Arab Universities in the State of Kuwait. I have studied more than 60 different courses over the course of five years under the supervision of competent doctors in everything related to mechanical

The study of printing sciences, the work paths of printing mechanisms, the nature of printing problems and their solutions inside the printing press, and the definition of printing operations are considered one subject and part of the study of printing process engineering with a theoretical and practical study system in the academy's printing presses. It is not considered the basic study within the department, as the department specializes in the mechanics of production in general, engineering, production, and printing technology.

## Practical experience

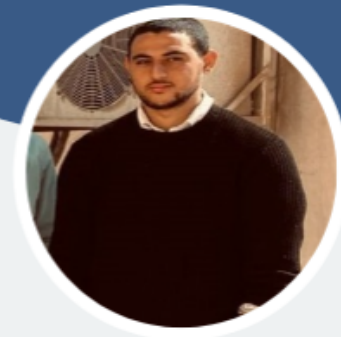

### June 2019 to May 2024 **trained**

Akhbar Alyoum Printing Press factory, 6 october

Weekly trainee for five years inside Akhbar Al-Youm printing factories to follow up on the various operating processes and discuss the scientific material in printing mechanics in a practical way inside the printing presses.

Gain experience in maintaining faults inside the machine and determining the causes of breakdowns or problems in the machine's operation or on the printed matter.

6 OCTOBER

PRIVATE

## July to August 2023

trainer

Inov Egypt, Nasr City

A complete training course on methods of solving working problems from accurately defining the problem. It is also an accredited course from the Ministry of Higher Education for students to train them on leadership qualities, direct business, small business founders, the challenges they face, and how to overcome them.

## June to August 2022

trained

Private company, Dokki, Giza

A complete course to learn SolidWorks skills and how to use the application and innovate in it

## May to June 2021

trainer

Giza Cables Company, 6 October city Industrial area

Trainee at the factory for cable production for a full month, following up on the electrical cable production processes starting from the construction stage to the quality stage and reviewing the final product and its conformity with the required measurements. I followed up on the electrical wire production processes from the beginning of the raw materials until converting them into a final product and following up on work obstacles and how to solve those obstacles and knowledge of the types of cables produced by the company

male 

Egyptian 

SINGLE 

### SKILLS

 English speaking, listening and translation

 Solving engineering problems of mechanical production processes scientifically

 Gaining information and previous experiences from electronic scientific research sites regarding the field of work and extracting engineering sciences and proficient research in them

## military service

---

military service is over and I have a military certificate.

## Graduation degree

---

Bachelor's degree in Engineering with a very good general grade, the graduation project is graded excellent, and I have an Engineers Syndicate card

The graduation project was a 4D CNC Router machine

Leadership, taking responsibility and working under pressure

Politeness in speaking and dealing with others in a humane manner

## LANGUAGE

English

## Hobbies

playing and watching football ■

Follow up on contemporary global and political events ■

Swimming and diving ■
