OBJECTIVE

In short, I am reliable, hard-working with strong attention to detail, and eager to learn about new technologies and business issues. I am able to work well both on my own initiative and as part of a team.

EDUCATION

Jordan University of Science and Technology

Bachelor's in electrical engineering

EXPERIENCE

IRBID DISTRICT ELECTRICITY CO.LTD.

Electrical Engineer

Trainee in a distribution company.

I have trained in low voltage Air Networks

Execution Section, Medium-Voltage Networks, and Ground Station Execution.

Section, and Medium Voltage Antenna Networks.

Created and implemented test plans.

Performed preventative maintenance and tested equipment.

PROJECTS

Street Lighting Control System

a smart control system is proposed using a motion sensor to control the lighting, especially the streets that connect between cities, in particular those far from residential areas. The smart motion sensor automatically activates when an object enters a certain area, raising the level of illumination to the highest degree. In the absence of activity in the area, the light is automatically adjusted to the lowest level, thus saving energy consumption greatly.

PERSONAL SKILLS

Good communication skills,teamwork,Self-motivation,Being flexible,quick learner,Good time management.
