ELIAS
BOULHAM
Software Engineering

About Me

I am a highly skilled software engineer with a Master's degree in Computer Science , My current focus is on ML and DNN in computer vision. I am proficient in problem-solving and creating new algorithms and have a strong inclination to read and learn about new challenges.

Language

- Arabic
- English (intermediate)
- French (intermediate)

Expertise

- Programming Languages: C, C++, C#, Java, Python, JavaScript
- Machine Learning Libraries: TensorFlow, kiras
- Computer Vision: OpenCV, Image Processing

interest

- comprehending mechanical systems such as car engines, electrical circuits and industrial electronics.

Experience

maths teatcher
private high school
1/2023-6/2023

I created and implemented lesson plans for high school students, explaining complex concepts to students at various levels of understanding.

computer vision and
object recognition with IA

I worked on a text recognition project and gained valuable experience with Machine Learning (ML) and Deep Neural Networks (DNN) .

Education

University of jijel
Bachelor of computer science
.2018-2021

University of jijel
Master of Artificial intelligence
2021-2023

Hard Skills

Programing

Artificial intelligence

Data meaning and analysis

Typing speed

Soft Skills

Excellent math skills

Creative and innovative

Project management

Punctual and hardworking

Honest and reliable

Sociable and enjoy working with people
