ABOUT ME

I have always possessed a strong passion for the field of surveying and have been highly motivated to expand my knowledge and expertise in this area. My enthusiasm is driven by a deep desire to comprehend various surveying techniques and further enhance my understanding of this discipline. Additionally, I have acquired substantial experience working with prominent GIS software including ArcGIS, ERDAS, and QGIS. I am currently seeking valuable opportunities to apply my skills and contribute to meaningful projects in this field.

- work with total station & level
- exact devices
- connect the points
- Raise and sign coordinate points with devices
- help the surveyor with reflector, Prism and paper sheet

TRAINING

Gis analyst

MAR-2023

Comprehensive Digitization Project for Hurgada

A project aims to digitally map the entire city of Hurgada. It involves gathering data through fieldwork, such as measuring temperature and noise levels, studying how land is used for buildings, and counting the number of trash cans in the city. The collected data will undergo thorough analysis to create detailed maps with various uses.

Surveyor

Nov-2022

Wady Kharobah

The training provided participants with knowledge and skills to operate surveying equipment. It covered the basics of surveying and training in using various equipment. The program also included guidance on importing surveying data and creating detailed maps.
