I love welding and engines.. I worked in several fields, including welding and engines. I learned welding in a well-known institute in Egypt and recognized in Germany it's name STI , and I have a certificate in this regard.. My skill is that I am skilled in welding and active. Completed many tasks in required time also love teamwork and team spirit. I also analyzed many reasons while working, and that was a reason to get things done in a short time and made me one of the most efficient people in the team in terms of productivity and quality. I re-worked with highly qualified people in this field to add to my experience, and due to Corona, circumstances made it necessary for me to leave work.

## Experiences

Welders MIG

8/2019 - 6/2021

### ECID - October 6th

I worked as a Mig Welder in the Motorcycle Engineering Company I also worked as a welder in several companies, including El Safwa and El Sewedy, where I worked in the field of large warehouse kiosks, and El Sewedy for 6-inch pipes for about 11 months.
