I am an engineer in the field of mining and metallurgy, where my main interest lies in extracting minerals in efficient and sustainable ways. I am good at examining terrain and analyzing geological formations to accurately determine mineral resources.

Education

07/2018 - 07/2023

■ Bachelor's degree in Mining and Metallurgy Engineering
Assiut University

Job Duties

- Is Responsible for :
- Analysis of terrain and geological formations to estimate mineral resources.
 - Using modern geological imaging and remote sensing techniques.
 - Develop effective exploitation plans to extract minerals sustainably.
 - Preparing engineering designs for mines in accordance with geographical and geological conditions.
 - Monitor schedules and ensure compliance with specifications.
 - Apply and implement safety procedures on sites.
 - Creating effective solutions to improve the efficiency of mineral extraction.
 - Participate in research of new technologies to improve the mining and mineral mining industry.
