Personal Details

- Date of Birth : 23/9/2000
- Nationality : 200075785607

Objective

About two years of practical experience in oil and gas production and seven years in electrical installation. I would like to search for an organization or company that provides me with an excellent work environment and opportunities to develop my technical and administrative skills and contribute to giving my best.

Education

- Duhok Polytechnic University/ZTI 2021- 2023
Control and Operation Petroleum Department

Experience

- Electrical employee and expert 2016 - Present
Edison Electric
Continuous work to generate electricity in hundreds of buildings and factories
- Summer Internship Program 27/8/2023 - 07/9/2023
DNO oil and gas company

During my summer internship at DNO Oil and Gas Company, I gained invaluable experience and knowledge in various aspects of the oil and gas industry. Through immersive training and site visits, I had the opportunity to work alongside industry experts and gain practical insights into the following areas:

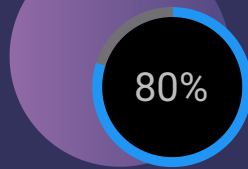

- Introduction to Oil and Gas with DNO's Training Coordinators.
- Health, Safety & Environment with Garreth Ratchford and Mark Wheeler (HSE Managers).
- Geology and Geophysics with Wieske Paulissen (Head of Expo & Subsurface).
- Well Construction with Salah Khalaf (Deputy Drilling Manager).
- Reservoir & Production with Ali Chalabi (WRM Manager).
- Process Engineering with Kurt Bosse (Technical Authority).
- Asset Integrity with Colin Linklater (MRI Manager).
- Process Delivery with Sohaib Tareq (EPC and Planning Manager).

Additionally, I had the opportunity to visit the Tawke and PSK fields, where I received inductions on HSE and security. During the site visits, I had the chance to explore various facilities, including the main camp and office, CCR & CPF mezzanine, PGP mezzanine, wellheads, refinery, and gas injection plant. These visits provided a practical understanding of the operational aspects of oil and gas facilities.

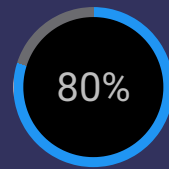

Skills

Oil and gas production technology

Drilling technology, methods, and techniques

Reservoir analysis and management

Horizontal and multilateral drilling techniques

Gas turbines, steam turbines and pumps

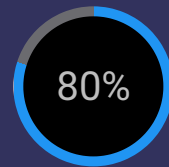

Extraction equipment production standards and operating thresholds

Platform testing and safety measures

Generating and distributing electricity to devices

Microsoft Word, Excel, PowerPoint

Achievements & Awards

- Lead Role in Successful Well Completion
- Managed and executed a well completion project resulting in production of 1,500 BOPD

Interests

- Watching Documentaries over the weekends
- Participating in social activities
- Volleyball

Languages

- Kurdish
- English
- Arabic
