

# HAMEUR LAIN AIMEN

Chemical Industry engineer

## PROFIL

Able and enthusiastic in carrying out tasks in the domain of chemical Engineering .  
Passionate about synthetic chemistry, specialized in pharmaceutical chemistry in the hope of working in the industrial field in order to maximize productivity and product quality while minimizing costs.

## Diplomas :

### 1-Baccalaureate in Natural Science and Life.

June 2017  
Chahid Tahri ali highschool

### 2-Master's degree in pharmaceutical chemistry

2017-2022  
University BADJI MOKHTAR ANNABA

## CONTACT

TÉLÉPHONE :  
**+213 698090250**

Email :

LinkedIn :  
Aimen Hameur lain

Adress : Annaba ,Algeria.

## LANGUAGES

- Arabic ( Native )
- Français ( Fluent )
- English ( Intermediate )

## center of interest :

Generale culture, Reading, Hiking

## SKILLS

### Soft Skills

- Organization/Teamwork, personal, creative motivation.
- Know how to write analysis and conclusion reports.
- Knowledge of safety rules

### Analytical techniques.

Knowledge in chemical testing of raw materials and finished products such ; icp-oes , HPLC , anions/cations by IC, volatile organic compounds by GC/MS, TOC, specific gravity, pH, titrations, melting point (kofler system), separation method (centrifugation).

### Chemical engineering :

Distillation, drying, filtration, liquid-liquid and liquid-solid extraction, recrystallization, evaporation, in-depth knowledge of laboratory glassware.

## WORK EXPERIENCE

### SARL HYGIEMAX : (Production of cosmetics products) :

Lab manager Quality control Analyst : February 2023 –until now

- Quality control of non-alcoholic general use wipes.
- Chemical analysis of raw material and finished product (PH, conductivity, mass uniformity, mixing dosage).
- Preparation of mixture .
- Verification of boxes and packaging

### MM Laboratory : (production of pharmaceutical products):

Quality assurance : Sep 2022-Nov 2022

- Implementation of the quality assurance policy.
- Control of the conformity of production processes in relation to benchmarks or specifications.
- Validation of procedures, specifications and documents of the quality assurance system.

### SONATRACH: (Skikda RA1K refinery laboratory)

Practical training Quality Control Analyst: August 2022

- Chemical analysis of crude oil constituents, analysis of LPG by CPG chromatography, analysis of gasoline by HPLC chromatography.
- Density and viscosity measurement of diesel, gasoline.
- Treatment of Wastewater (turbidity and conductivity test).

**Saidal Group :****Quality Control Internship:**

Jan 2020-March 2020

- Friability, Hardness, Thickness, Disintegration / disintegration time, Residual moisture in process lab tests .
- Chemical analysis of raw material and finished product (appearance, color, uniformity of mass, friability, dosage of grains).
- Interpret the results and write analysis reports of samples, identify anomalies, their causes, and propose solutions.
