- Design of analysis reports
- Monitoring of raw materials control specifications and finished products

11/2018 -  
06/2019

### Study and execution engineer - Sud Potasse Company

- Make material and thermal balances (global and partial) for factory (refrigeration unit, fluidized bed dryer, hot air generator, crystallizer)
- Sizing of pipes, pumps, basins...
- PID and PFD optimization
- Monitoring and control of the progress of construction work of the 'Sud potasse' factory
- Factory start-up

03/2018 -  
07/2018

### ETAP Company

[Graduation internship]

- Design and simulation of a gas treatment unit GTP-T factory

07 /2017-  
08/2017

### GCT company

[Engineer internship]

- Discover the manufacturing process of ammonitrate on an industrial scale
- Sizing of an exchanger

07 /2016-  
08/2016

### SITEP Company

[Engineer internship]

Discover the oil extraction process
