Curriculum Vitae

- ♦ Make sure that all approved modifications to works are recorded on red-lined 'as-built' drawings, and are verified as correct by field personnel
- ♦ Ensure materials are stored in accordance with specifications and project requirements
- ♦ Ensure compliance with safety rules and procedures, Standard Operating Procedures (SOP's), and Good Management Practices (GMP's)
- ♦ Review of Hydro test packages
- ♦ Line walk and punch list preparation before hydro test
- ♦ Supervise performance of hydro-testing
- ♦ Verification of reinstatement of piping systems after completion of all hydro testing activities
- ♦ Torquing and tensioning activities
- ♦ Verification Mechanical completion package
- ♦ Pre-commissioning and commissioning activities (air drying, leak test, inerting & start-up)
- ♦ Chemical cleaning for the stainless piping
- ♦ Conduct regular progress and coordination meetings with the contractor

Project : Boosting Phase III – Hassi R'mel

Company : JGC Construction International – AMS Manpower supply / July 2020 - December 2020

Position : [Piping Supervisor](#)

Job description:

- ♦ Involved and responsible for carrying out pressure testing of piping according to safety procedure, project specification and scope
- ♦ Monitor, supervise and assist subcontractors to achieve the planned quality objectives
- ♦ Coordinating with other disciplines for carrying out testing and torquing activities
- ♦ Strong technical knowledge of pipe hydrotesting process and work steps, including disassembly and reinstatement of pipe systems.
- ♦ Inspection of hydro test packages work (preparation, cleaning, filling water , pressure test ,and air drying) with DGM and SH
- ♦ Torquing and tensioning activities of bolted flange connections
- ♦ Close coordination with client for planning of the job and execution of milestone work
- ♦ Prepare the daily progress report and weekly progress report
- ♦ Closing punch list of walk down system

Project : Realization of Pipeline BRN- MLE 180 Km

Company : SONATRACH / AGIP Group – Red Med Manpower supply / Nov. 2019 - May 2020

Position : [Piping & Pipeline Supervisor](#)

Job description:

- ♦ Monitor the activities of subcontractors to ensure compliance with specifications and schedules
- ♦ Perform all quality assurance procedures and requirements
- ♦ Supervise the prefabrication, erection of piping, and installation of pipeline, manifolds & Tie- in
- ♦ Review of Hydro test packages
- ♦ Line check and punch list preparation before hydro test
- ♦ Inspect performance of hydro testing work for pipeline & piping
- ♦ Torquing and tensioning activities of bolted flange connections
- ♦ Control the leak test of equipment such as ball valves, emergency shutdown valves before installation
- ♦ Verify that the piping systems and associated equipment are correctly installed according to

Curriculum Vitae

approved P&ID plans

- ♦ Inspection of air blowing, oil flushing, and gross leak testing for piping and Tie in
- ♦ Supervise the execution of pre-commissioning and commissioning activities related to piping and mechanical disciplines for the project (with regard to procedures, quality, HSE, cost and schedule optimization) to the full satisfaction of Operations.
- ♦ Prepare the daily progress report and weekly progress report
- ♦ Coordinate with HSE team for HSE measures

Project : Realization of the Crude Pumping Station SP1-HEH/R-OB - Hassi Messaoud

Company : SONATRACH TRC – MCE Manpower supply / November 2018 - August 2019

Position : [Mechanical Engineer](#)

Job description:

- ♦ Approval the procedures and plans for pipeline & piping construction
- ♦ Supervise the prefabrication, erection of piping, and installation of pipeline, manifolds & Tie in
- ♦ Inspection of sandblasting ,painting and coating work
- ♦ Torquing and tensioning activities of bolted flange connections
- ♦ Inspect hydro test work (cleaning, filling, pressure testing, and dewatering) with DGM
- ♦ Flushing the piping system of Lube Oil and ATU Unit
- ♦ Chemical cleaning for the stainless pipes
- ♦ Pre-commissioning & commissioning activities (leak test and inerting test / Start up)
- ♦ Prepare the daily progress report and weekly progress report

Project : Boosting SBC Phase III - Hassi R'mel

Company : **Company** : GTP / March 2018 - September 2018

Position : [Senior Piping Engineer](#)

Job description:

- ♦ Plan the manpower and equipment required to execute the job
- ♦ Make sure to provide good quality of work to customer
- ♦ Ensure employee's safety and productivity
- ♦ manage of underground and aboveground piping installation
- ♦ Storage of piping spools in good condition
- ♦ Monitor and assist hydro test work, wrapping team & holiday test
- ♦ Torquing and tensioning activities of bolted flange connections
- ♦ Prepare the daily progress report and weekly progress report

Project : Pipeline installation GR6-48" Lot 1 Rhoud Nouss-Hassi Messaoud

Company : SONATRACH TRC – ENACT Manpower Supply / January 2016 - March 2018

Position : [Pipeline & Hydro Test Engineer](#)

Job description:

- ♦ Approval the procedures and plans for pipeline& piping construction
- ♦ Supervise pipeline and piping construction
- ♦ Inspect hydro test work (cleaning, filling, pressure testing, dewatering & air drying) with DGM
- ♦ Check the leak test of equipment such as spherical ball valves, emergency shutdown valves
- ♦ Supervise the nitrogen purge test of residues
- ♦ Prepare the daily progress report and weekly progress report

Curriculum Vitae

- ♦ Coordinating with the planning and quality control departments

Project : Pipelines installation

1. Project GREO Ø28"- 82kmBatna
2. Project Bechar-Beni Abbess Ø12"-223Km
3. Project M'sila-BBA Ø28"- 60Km
4. Project MostaganemØ28'-42Km

Company : KANAGHAZ-Spa / February 2010 - December 2015

Position : Pipeline Construction Engineer

Job description:

- ♦ Monitor construction activities to ensure quality and safety standards are met while achieving maximum work efficiency
- ♦ Ensure that the pipeline trench agrees with the project's design
- ♦ Control stringing and cold bending of pipeline
- ♦ Supervise the coating work and laying of pipeline into place
- ♦ Inspect pipeline backfilling and crossing road work
- ♦ Monitor the bolt tightening team and hydro test team
- ♦ Participate in pre-commissioning and commissioning
- ♦ Restoration to return the land to its original condition
- ♦ List of welding procedure specifications and supporting PQRs
- ♦ Prepare the daily progress report and weekly progress report

Project : UTBS-Hassi Messaoud

Company : GTP / February 2008 - April 2009

Position : Mechanical & Piping Construction Engineer

Job description:

- ♦ Manage field construction operations
- ♦ Organize piping prefabrication crew in the workshop
- ♦ Storage of piping spools in good condition
- ♦ Supervise performance of hydro-testing, piping aboveground installation as well as underground
- ♦ Quality control of piping material
- ♦ Ensure that the road crossing works meet the acceptance criteria
- ♦ Participate in pre-commissioning and commissioning
- ♦ Daily welding inspection report
- ♦ Installation & inspection of static equipment include padding ,elevation, position, orientation , verticality, levelness, alignment

Language Skills:

- ♦ Arabic :Native speaker
- ♦ French :read, spoken and written
- ♦ English: read, spoken and written (middle level)

Computer Skills:

- ♦ Word, Excel & Power point
- ♦ Solid Works, MS Project & GMAO
- ♦ Standards API ,ASME
